STRATEGIES

Explaining the best course of action to solve the problem

04

CONCLUSION

Summary of our findings

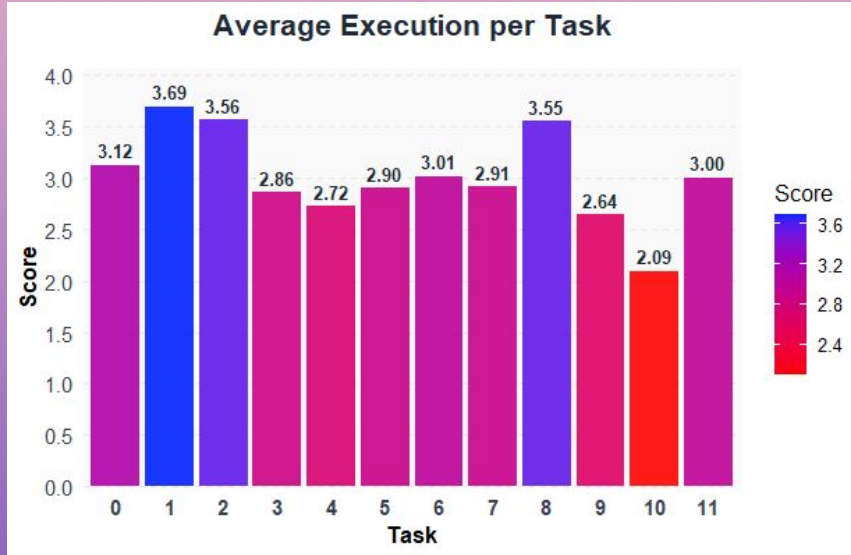

PROBLEM

- No idea on how to win games in curling
- Try to impress your date with data analyzed strategies
- Learn what skills are the best for beginners to look like pros

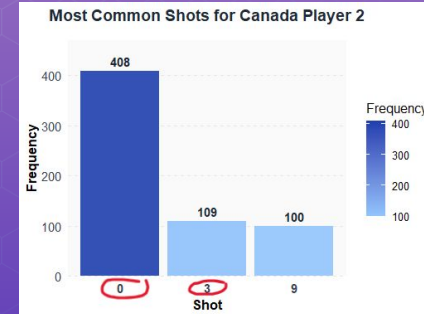

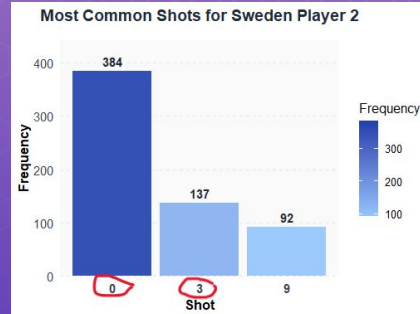

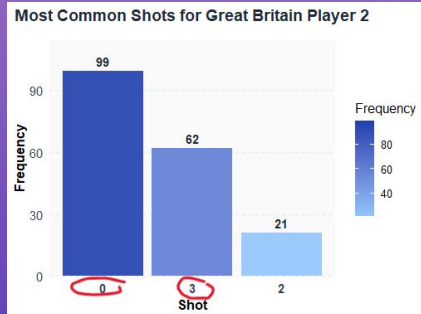

DETAILS : Tasks

TASKS

Tasks are different types of shots, and the most important decision in a curling game.

OUR IN-GAME STRATEGIES

KNOCK THEM OUT

By knocking their stones out of play, we reduce the chance of higher scoring

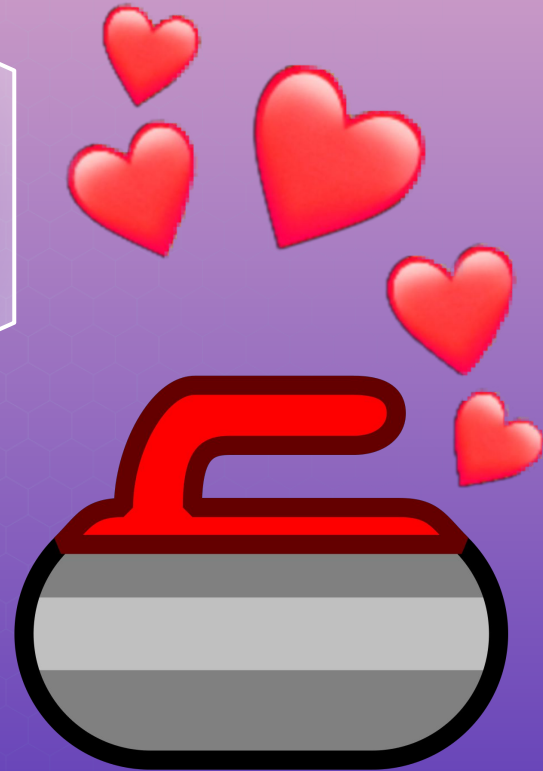

BLOCK THEM

By placing guards, we make it more difficult to score

KEEP IT SIMPLE

Aiming straight for the centre maximizes chances of scoring points

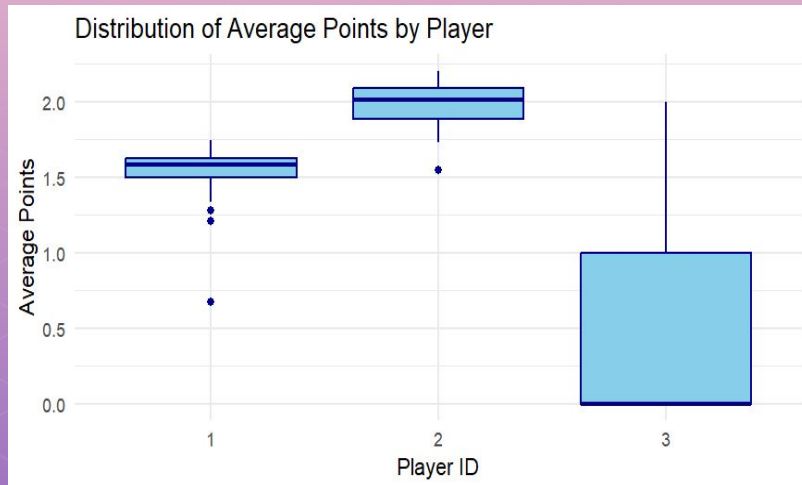

TEAM STRATEGIES

LAST STONE FIRST END

Teams who start with the last stone win 57.3% of games. Making sure you have the early advantage is important.

BEST PLAYER SECOND

Having your best player throw second means they make the most important throws, so you can maximize the points scored.

TeamID	PlayerID	avg
<int>	<int>	<dbl>
1	27	2 3.33
2	19	2 3.30
3	10	2 3.28
4	17	2 3.27
5	14	2 3.26
